ljetovanje

Dragi gosti,
dobro nam došli u Kaštela, grad
povijesne ljubavne priče o Miljenku i
Dobri, domovinu Crljenka kaštelskog,
sjedište brojnih kula i dvoraca koji su na raznim
fotografijama obišli cijeli svijet, grad u kojemu i
danas raste 1500 godina Stara maslina, turistički
biser sa 17 km dugom obalom i jedinstvenim
zaljevom kakvog nema na Mediteranu. Dobro
nam došli u grad sporta – grad najboljih
hrvatskih odbojkaša!

Velika mi je čast pozdraviti vas u ime Grada
Kaštela, a sve ono što imamo nastojimo vam
prikazati kroz brojne kulturne i zabavne
manifestacije tijekom cijelog ljeta i duže.

Kristalno čisto more, prostrane plaže uz obližnje
kule i dvorce, prirodna su ljetna pozornica za
predstavljanje povijesnog blaga koje se smjestilo
ovdje, u srcu Dalmacije između dva UNESCO-va
grada. Želim vam bezbrižan i ugodan odmor u
našem predivnom gradu.

Sa sobom ponesite najljepše uspomene iz
Kaštela koje ćete pamtit i cijeli život i ponovno
nam se vratite. Srdačno vas očekujemo i
radujemo se vašem povratku!

Gradonačelnik Kaštela
Denis Ivanović

KAŠTELSKO KULTURNO LIJETO

*Kaštelsko kulturno ljeto najveća je kulturna
manifestacija u Kaštelima, na čijem se programu
nalaze brojna glazbena, kazališna, plesna,
izložbena i slična događanja. Grad Kaštela u
suradnji s Turističkom zajednicom, brojnim
udrugama građana, kulturnim organizacijama i
ustanovama te pojedincima organizira
programe kulture na gotovo svim trgovima,
rivama, ulicama i dvorcima. I tako već dugi niz
godina, program Kaštelskog kulturnog ljeta
sve je bogatiji i popularniji kako među
Kaštelanima tako i njihovim gostima.*

Dear guests,
Welcome to Kaštela, the city of the historic
love story about Miljenko and Dobri, the
homeland of Crljenak kaštelski, the land of many
towers and castles that have circled the world on a
number of photographs, the city where the 1500-year-
old olive tree grows, the tourist pearl with a 17 km long
coastline and a unique bay that is unparalleled in the
Mediterranean. Welcome to the city of sports – the
town of Croatia's best volleyball players!

It is my great honor to greet you on behalf of the City
of Kaštela. We will do our best to present to you all we
have through a number of cultural and entertaining
events throughout and after the summer.

The crystal clear sea, vast beaches along with the
nearby towers and castles, are the summer settings for
presenting the cultural treasures, nestled here in the
heart of Dalmatia between two UNESCO cities. I wish
you a relaxing and pleasant holiday in our beautiful city.

Return from Kaštela with the best memories you will
remember all your lifetime and do come back. We
await you and look forward to seeing you again!

Mayor of Kaštela
Denis Ivanović

THE KAŠTELA CULTURAL SUMMER

The Town of Kaštela in association with the Kaštela
Tourist Board, many civil societies, cultural societies
and institutions and individuals, organizes cultural
programs on nearly all squares, waterfronts, streets
and castles.*

*For a number of years already, the program of the

Legendarni glazbenik Ibrica Jusić i sve popularnija i višestruko nagrađivana dubrovačka klapa Kaše nastupit će na pozornici sa svojim hitovima, koji nikoga ne ostavljaju ravnodušnim. Prethodit će im plesni program domaćih KUD-ova. Bit će to zasigurno večer za pamćenje, koju će otvoriti gradonačelnik Kaštela Denis Ivanović. Zastava Kaštelskog kulturnog ljeta vijorit će se sve do 2. rujna.

KONCERTI MARKO ŠKUGOR

Marko Škugor će sa svojim peteročlanim bandom održati koncert 23. kolovoza ispred Kaštilca u Kaštel Gomilici. Škugor je pjevačku karijeru započeo u poznatim klapama (Maslina, Kampanel), a 2013. godine je kao solist i prvi tenor "Klape s mora" predstavljao Hrvatsku na Eurosongu s pjesmom "Mižerja". Nakon Eurovizije počinje njegova samostalna karijera, koja je vezana uz dalmatinski pop zvuk, ali i uz prizvuke opernog pjevanja. Prvi veliki uspjeh bilo je osvajanje Grand prix-a na Splitskom festivalu 2014. godine s pjesmom "Devet slova jedne riči" uz Alena Nižetića i Duju Cocu, a nakon toga uslijedile su uspješnice "Dalmatinska vilo" i obrada pjesme Vinka Coci "Zlato moje". U ljeto 2015. godine s pjesmom "Oće duša vanka tila" Marko osvaja 2. nagradu publike na Festivalu dalmatinske šansone u Šibeniku, a pjesmom "Srce južnjačko" najavljuje svoj debitantski album "Dalmatinska vilo" koji je puna tri mjeseca bio jedan od najprodavanijih albuma u Hrvatskoj. Ljeto 2016. obilježile su turneje s više od 40 samostalnih koncerata, a najveći festivalski uspjeh dolazi 2017. godine na Splitskom festivalu gdje s pjesmom "Ka' dica" osvaja Grand prix, a sa Četiri tenora osvaja 1. nagradu publike na jubilarnoj 20. Dalmatinskoj šansoni u Šibeniku.

CONCERTS MARKO ŠKUGOR

With his band of five, Marko Škugor will hold a concert August 23, 2018 in front of Kaštilac in Kaštel Gomilica. Škugor began his singing career in well-known klapas (Maslina, Kampanel), and in 2013, as a soloist and first tenor of the "Klapa s mora", he represented Croatia at the Eurovision Song Contest with the song "Mižerja". This marked the beginning of his solo career that has been close to

Dalmatian pop as well as to elements of opera singing. His first great success was the Grand prix awarded at the Split festival in 2014 with the song "Devet slova jedne riči" along with Alen Nižetić and Duje Cocu. This was followed by successful songs "Dalmatinska vilo" and the remake of Vinko Coci's "Zlato moje". In the summer of 2015 "Oće duša vanka tila" won him the 2nd audience award at the Festival of Dalmatian Songs in Šibenik, while "Srce južnjačko" announced his debut album "Dalmatinska vilo" that for three months has been one of the best sold albums in Croatia. During his tour in the summer of 2016 he held more than 40 solo concerts. The greatest festival success came in 2017 at the Split festival when "Ka' dica" earned him the Grand prix, and together with Four Tenors, he won the 1st audience award at the 20th jubilee Festival of Dalmatian Songs in Šibenik.

Legenda o Miljenku i Dobrili / The Legend about Miljenko and Dobrila

The legend about Miljenko and Dobrila is a story about a young couple from noble families Vitturi and Rušinić. The quarrel of their parents stood in the way of their love. Count Radoslav, Dobrila's father was known as a cruel nobleman who imposed big taxes on his serfs. Count Adalbert, Miljenko's father was a kinder person and had more understanding for the difficulties of his serfs. Having found out about the love of the young couple, count Radoslav forbade them to see each other, and Miljenko's father sent him to Venice. The parents decided that Dobrila should marry an older nobleman Družimir, but Miljenko, having found out about this plan, disrupted the marriage. The authorities exiled him to Visovac, and

Dobrila was sent to a monastery in Trogir. The couple, however, found a way to flee and meet. Meanwhile, in order to calm the peasants who protested against excessive taxes, count Radoslav decided to give permission for their wedding. But after the grand wedding, Radoslav, seized by anger, killed Miljenko in front of the castle. Several months later, Dobrila became ill of grief and

Muzej

Sjedište Muzeja grada Kaštela nalazi se u jednoj od najbolje očuvanih kaštelanskih utvrda-kaštelu Vitturi. Kaštela su drugi grad po broju stanovnika u Splitsko-dalmatinskoj županiji, sa sedam naselja razmještenih duž obale Kaštelanskog zaljeva. Svako naselje nastalo je tijekom razdoblja turske opasnosti, kada su plemstvo i Crkva iz okolnih gradova Splita i Trogira, podigli svoje kaštele u svrhu zaštite stanovništva od turskih napada.

Osim novovjekih povijesnih jezgri, na kaštelanskom prostoru postoji niz arheoloških lokaliteta iz prapovijesnog, antičkog i srednjovjekovnog razdoblja.

Muzej grada Kaštela osnovan je 1999. god., a nastao je preustrojem Zavičajnog muzeja Kaštela, koji je izrastao iz rada galerije Studin (osnovane 1988. godine). Bogatstvo kulturne baštine kaštelanskog prostora ogleda se i u radu muzeja, koji prikupljajući i prezentirajući građu doprinosi očuvanju kulturne baštine ovog prostora.

Museum

The seat of the Municipal Museum of Kaštela is located in one of the best-preserved fortresses in Kaštela – Vitturi Castle. Kaštela are the second city by population in Split-Dalmatia County, comprised of seven villages spreading along the coast of the Kaštela Bay. Each village originated during the period of the Ottoman threat, when the nobility and the Church from the surrounding cities of Split and Trogir built their castles to protect the population against the Ottoman attacks. Apart from the Modern era historical cores, there is a whole range of archaeological sites dated to prehistoric times, Classical Antiquity and Middle Ages within the area of Kaštela.

The Municipal Museum of Kaštela was founded in 1999, through restructuring of the Regional Museum of Kaštela, which had originated from the Studin Gallery (founded in 1988). The richness of the cultural heritage of the Kaštela area is reflected in the work of the museum, which contributes to preservation of cultural heritage of this area by gathering and representing the material. There are Archaeological, Cultural-historical, Modern and Contemporary Art, Pedagogical, Documentation, as well as Restoration and Conservation departments operating within the Museum. The permanent exhibition of the museum is located in the Vitturi Castle in Kaštel Lukšić, and in 2012, a permanent exhibition was opened at the Archbishop's castle in Kaštel Sućurac. The museum takes care of two archaeological sites: the remains of an ancient settlement of Siculi at Resnik and Mujina cave in Labinska draga.

Unutar muzeja djeluje arheološki, kulturno-povijesni, odjel moderne i suvremene umjetnosti, pedagoški, dokumentacijski i restauratorski odjel. Stalni postav muzeja smješten je u dvorcu (kaštelu) Vitturi u Kaštel Lukšiću., a od 2012. god. otvoren je i postav u nadbiskupskom kaštelu u Kaštel Sućurcu. Muzej brine i o dva arheološka nalazišta: ostacima antičkog naselja Sikuli u Resniku i o Mujinoj pećini u Labinskoj dragi.

Kaštel Vitturi u Kaštel Lukšiću

Sam kaštel sa okolnom povijesnom jezgrom dobro je očuvan, a obnovom u razdoblju od 1993. do 2001. god., vraćen mu je izgled s početka 18. st.

Tada je bio u svojoj najreprezentativnijoj fazi i danas predstavlja kulturni centar Grada Kaštela. Tijekom istražnih radova ponovno je otkriven obrambeni jarak i kameni most ispred sjevernog ulaza.

Kaštel je izgradila plemićka obitelj Vitturi, krajem 15. i tijekom prve polovice 16. st. Uslijed čestih turskih napada bilo je nužno zaštititi domaće stanovništvo, koje je do izgradnje kaštela živjelo u srednjovjekovnom selu Ostrog na padinama Kozjaka.

Uz kaštel je formirano manje utvrđeno naselje sa do danas sačuvanom pučkom kamenom arhitekturom i organizacijom prostora.

Stalni muzejski postav

Stalni postav muzeja nalazi se na drugom katu kaštela Vitturi, a otvoren je 2008. godine. Postav se sastoji iz dva dijela; kulturno-povijesnog (južno krilo) i arheološkog (istočno krilo) sa 679 izložaka. Između ova dva dijela stalnog postava

Vitturi Castle in Kaštel Lukšić

The castle itself with its surrounding historical core is well preserved, and in the period between the year of 1993 and 2001, its appearance from the beginning of the 18th century has been restored. The castle was in its most representative stage in that period.

During the research works, defensive moat and a stone bridge in front of the northern entrance were rediscovered.

The Castle was built by the noble family Vitturi, at the end of the 15th and the beginning of the 16th century. Due to frequent Ottoman attacks, it was necessary to protect the local population, which had been living in the medieval village of Ostrog at the slopes of the Kozjak Mountain before the construction of the Castle. Along with the castle, a small, fortified settlement was also formed, and its folk stone architecture and space organization has been preserved till this day.

nalazi se galerija u kojoj je lapidarij.

U kulturno-povijesnom dijelu prezentiran je razvoj pojedinih kaštela i urbanizam kaštelanskih naselja, kao i prikaz obrane od Turaka sa zbirkom oružja. U odvojenom dijelu prikazan je život plemenitaških kaštelanskih obitelji i kaštelanska narodna nošnja. U arheološkom dijelu stalnog postava prezentirani su vrijedni arheološki nalazi iz razdoblja. Posebno su zanimljivi litički Mujinoj pećini (45000-39000 god. pr. Kr.), brojni nalazi iz antičkog naselja Sikuli i grobni prilozi iz starohrvatskih nekropola.

Nadbiskupski kaštel u Kaštel Sućurcu

Povijesna jezgra Kaštel Sućurca formira se krajem 15. st. oko kule koju je 1392. podigao splitski nadbiskup Andrija Benzi na predjelu zvanom Lučac. Uz kulu, čiji su temelji i danas vidljivi, izgradio je splitski nadbiskup Bartolomeo Averoldo 1489. god. obrambeni sklop Kaštilac u kojem je nadbiskupska palača bila centralni dio. Čitav Kaštilac

Permanent museum display

The permanent museum display is located at the second floor of the Castle Vitturi, and it was opened in 2008. The display is comprised of two parts: cultural-historical (southern wing) and archaeological (eastern wing), with a total amount of 679 exhibits. Between those two parts, there is a gallery with a lapidarium.

Development of the individual castles and urbanism of the Kaštela villages, as well as the representation of defence against the Ottomans through the weapon collection, are shown in the cultural-historical part. The life of the noble families of Kaštela, as well as folk costumes, is represented in a separate part.

Within the archaeological part of the permanent exhibition, there are valuable archaeological finds dated to Prehistory, Classical Antiquity and the Middle Ages. Lithic artefacts of the Mousterian culture discovered in Mujina cave (45000-39000 BC) are of a special interest, as well as the numerous finds from the ancient settlement of Siculi and the sepulchral contributions from the Early Croatian necropolae.

The Archiepiscopal Palace in Kaštel Sućurac

The historical core of Kaštel Sućurac was formed at the end of the 15th century around the tower constructed by Andrija Benzi, the Archbishop of Split, in 1392 in the area called Lučac. In 1489, next to the tower whose foundations are still visible

bio je dobro utvrđen sa zidom od kojeg je krunište dijelom očuvano. Na drugom katu nadbiskupske palače nalaze se muzejski prostori, s bogatom kulturno-povijesnom i arheološkom zbirkom.

Od 2012. godine ovdje djeluje arheološki odjel muzeja.

U susret stalnom postavu

Na prvom katu nadbiskupske palače postavljena je izložba „U susret stalnom postavu“. Sadrži dva dijela: kulturno-povijesni i arheološki sa 138 izložaka. Kroz izloženi materijal prikazano je bogatstvo pokretne kulturne baštine iz Kaštel Sućurca. Veći dio materijala potječe iz zbirke koju je prikupila udruga Podvorje, koja se do 2012. god. brinula o njoj.

Dio izloženog arheološkog materijala pronađen je istraživanjima djelatnika arheološkog odjela Muzeja grada Kaštela (Krtine, Brižine i Trstenik) i Muzeja hrvatskih arheoloških spomenika (Putalj). Od eksponata u postavu izdvajaju se nalazi s brončanodobne gradine na Putalju i predromanički luk oltarne pregrade (tzv. sućurački luk).

today, the Archbishop of Split Bartolomeo Averoldo constructed a defensive complex Kaštilac in which the Archiepiscopal Palace was the central part. Entire Kaštilac was well fortified with a wall, and its battlements have been partially preserved. On the second floor of the Archiepiscopal Palace, there are museum premises with rich cultural-historical and archaeological collections. Since 2012, the archaeological department of the Museum has been located here.

Towards the permanent display

The exhibition entitled “Towards the permanent display” has been organized on the second floor of the Archiepiscopal Palace. It is comprised of two parts: cultural-historical and archaeological, with 128 exhibits. The exhibited material depicts the wealth of the movable cultural heritage of Kaštel Sućurac. The largest part of the material originates from the collection of the association Podvorje, which was in charge of its maintenance up until 2012. Part of the exhibited archaeological material has been discovered during the excavations of the employees of the archaeological department of the Municipal Museum of Kaštela (Krtine, Brižine and Trstenik) and of the Museum of Croatian Archaeological Monuments (Putalj). Among the exhibits, the finds from the Bronze Age hillfort at Putalj and early-Romanesque arch of the altar partition (a so called Arch from Sućurac) are especially noticeable.

Mujina cave

Mujina cave holds traces of presence of the Neanderthal men in this area. It is located within the karst environment around Labinska draga, which historically served as an important communication route with the hinterlands. For that reason, several archeological sites from different periods can be found here. In the approximate vicinity of the cave, there are also the remains of the Roman road which connected Siculi with the hinterlands.

The cave is of small dimensions with a big entrance facing the south-east. Small plateau in front of the entrance enables good control of the surrounding area, which was important to prehistoric men because it helped them notice the animal herds that used to inhabit this area. Systematic archaeological research within the cave has uncovered rich layers of Mousterian culture dated to the period from 45000 to

Mujina pećina

Tragovi prisutnosti neandertalca na ovom prostoru sačuvani su u Mujinoj pećini. Smještena je u sačuvanom prirodnom krškom okolišu Labinske drage, koja je kroz prošlost bila važna komunikacija prema zaleđu. Sa manjeg platoa ispred pećine moguća je dobra kontrola okolnog prostora, što je pračovjeku bilo važno zbog mogućnosti ranog zapažanja krda životinja koje su tada nastanjivale ovaj

prostor. Sustavna arheološka istraživanja u pećini otkrila su bogate kulturne slojeve musterijenske kulture iz razdoblja od 45000 do 39000 god. prije Krista. U slojevima koji su oko 2 metra duboki pronađeni su raznoliki litički artefakti.

Svjedoče o djelatnostima koje je u pećini obavljao neandertalac, a brojni nalazi životinjskih kostiju o prehrani. U vrijeme korištenja pećine klima je bila znatno hladnija, a razina mora oko 90 metara niža.

Antički Sikuli

Ostaci antičkog naselja Sikuli nalaze se u Resniku pored Kaštel Štafilića, uz ušće istoimenog potoka. Ono se spominje u brojnim povijesnim izvorima, a rimski car Klaudije ovdje je naselio vojne veterane polovicom 1. st. pr. Kr. Dugogodišnjim arheološkim istraživanjima utvrđeno je da se naselje prostire na površini od oko 36 000 m² i da je osnovano u 2. st. pr. Kr. Osim ostataka pravilno organiziranih stambenih blokova i ulica, sačuvani je manji dio bedema i danas potopljena podmorska pristaništa. Osim antičkih pristaništa, u podmorju ispred ušća potoka nalaze se ostaci paleolitičkog nalazišta i neolitičkog naselja.

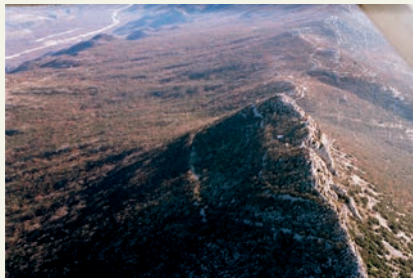

39000 BC. Within the 2 metres deep layers, various lithic artefacts and animal bones have been discovered. They testify about the activities performed by the neanderthals within the cave, and numerous animal bones tell us about their diet. While the cave was being used, the climate was significantly colder and sea level about 90 metres lower.

Classical Antiquity settlement of Siculi

The remains of the Classical Antiquity settlement of Siculi are located in Resnik, next to Kaštel Štafilić, at the mouth of the eponymous creek. It has been mentioned in numerous historical sources, and the Roman Emperor Claudius settled his military veterans here in the mid-1st century BC. During many years of archaeological research, it has been established that this settlement spread over the area of 36.000 m² and that it was founded in the 2nd century BC. At this time, the surroundings of the Kaštela Bay were the stage for very dynamic events related to Greeks from Issa, Romans and Delmatae. Apart from the remains of the evenly organized residential blocks and streets, a smaller part of the fortification walls and underwater docks that are today submerged into the sea have also been preserved. It is assumed that the layout was rectangular, with a surface of 3.6 ha. Residential blocks were extremely long, around 13 metres wide. The settlement was destroyed during the second half of the 1st century BC, as evidenced by the remains of the collapsed roof structures and soot found in most of the researched houses. Apart from the ancient docks, the remains of a Palaeolithic site and Neolithic settlement are also located underwater, in front of the mouth of the creek.

Biranj

Biranj je slojevito arheološko nalazište na istaknutom kozjačkom vrhuncu (631 m) iznad Kaštela. Ovdje se nalazi prapovijesno gradinsko utvrđenje, kasnoantički kastrum, svetište vrhunskog slavenskog božanstva Peruna i romanička crkva Sv. Ivana. Vanjski bedem prapovijesne gradine dugačak je gotovo 800 metara i lučno zatvara površinu od gotovo 73 000 m², što lokalitet svrstava u red površinom najvećih gradinskih utvrđenja na istočnoj jadranskoj obali i zaleđu. Bedemi su suhozidni, a osipina je na pojedinim mjestima i do 12 metara široka. Arheološka istraživanja otkrila su kulturne slojeve iz neolitika i brončanog doba, sa razvijenom litičkom industrijom.

Biranj

Biranj is a stratified archeological site located at a prominent peak of Mount Kozjak (631 m) above Kaštela. A prehistoric hillfort, late Classical Antiquity Castrum, the sanctuary of the supreme Slavic god Perun and the Romanesque church of Sv. John are located here. The outer bastion of this prehistoric hillfort is almost 800 meters long and encloses the area of nearly 73.000 m², which makes it one of the largest hillforts on the eastern Adriatic coast and in the hinterland. The bastion is made of dry wall and is at some parts up to 12 metres wide. Archaeological research has revealed cultural layers dated to Neolithic and Bronze Age, with a well developed lithic industry.

Kaštela će vas privući na prvi pogled. Uživat ćete u zvukovima kamenih ulica, mamit će vas mirisi i okusi restorana i konoba, opustit ćete se na vrućem žalu njegovih plaža, otkrit ćete tajne i legende bogate povijesti i oduševit će vas jedinstveni pogled s brda Kozjak na Kaštelanski zaljev, susjedne UNESCO gradove Split i Trogir i magični srednjodalmatinski arhipelag.

Prirodno naslijeđe (Bogatstvo prirode)

Uzgoj vinove loze i maslina duboko je utkan u tradiciju kaštelanskog težaka, a mnogi će reći da trešnje nigdje na svijetu nisu tako slatke i sočne kao u Kaštelima. Na surovom dalmatinskom kršu trudom generacija niknula su plodna polja, a kaštelanski ribari i danas ranom zorom odvezuju svoje brodice u potrazi za plavom i bijelom ribom. Tu, u prirodnom okruženju Kozjaka i Kaštelanskog zaljeva, uživat ćete u plodovima dalmatinske prirode, diveći se njenom bogatom naslijeđu.

The cultivation and growing of vine and olive is deeply woven in the tradition of Kaštela farmers. Many would say that cherries are nowhere so sweet and juicy as they are in Kaštela. Cultural heritage (On the footsteps of the Game of Thrones)

Renaissance stone castles that are almost immersed in the sea will enchant you by their beauty. Scattered along the coast of the City of Kaštela, these castles used to be the nucleuses around which seven picturesque and vivid Mediterranean villages once were formed. While you are discovering which one of them is the most romantic, you will feel as if you are on the set of the Game of Thrones.
